

SPYROS PAPASTERGIOU

Financial Data Analyst | Business Analyst

Farsala, Larissa, Greece | +30 698 231 7823 | papastergiousp@gmail.com

Portfolio: phytai.com | GitHub: github.com/papastergiousp-maker | LinkedIn: linkedin.com/in/spyros-papastergiou

PROFESSIONAL SUMMARY

Financial Data Analyst & Business Analyst with an Integrated Master's in Business Administration and hands-on experience in Python, SQL, Power BI, and Tableau. Results across finance, quality control, and agricultural operations: 23% cost reduction per producer, 25% fewer raw material deviations, and 98% drop in compliance penalties. Building a FinTech-focused project portfolio (25+ GitHub projects) in stock analysis, revenue forecasting, and risk modeling. Seeking a Data Analyst, Business Analyst or FinTech Analyst role where data-driven decisions create measurable business impact.

WORK EXPERIENCE

Agricultural Data Coordinator | 05/2026 to Present

Agroprotasis Barbara Thanopoulou | Farsala, Greece

- OSDE Data Management: Managed end-to-end data workflows for agricultural subsidy applications (OSDE/EAE), ensuring accuracy and compliance with OPEKEPE submission requirements.
- Data Records & Reporting: Maintained structured Excel databases tracking client applications, agronomist services, and operational exchanges.
- Financial Data Processing: Processed service invoices and supply records via Epsilon Net, maintaining accurate financial documentation.
- Process Automation: Proactively identified data entry bottlenecks and implemented AI-assisted workflows, reducing per-application processing time during peak OSDE season.

Skills: Excel, Epsilon Net, OSDE/EAE, Data Workflows, AI Automation

Office & Accounting Assistant | 02/2025 to 09/2025

Georgika Efodia Archontis | Farsala, Greece

- Database Development (Excel): Designed and maintained a structured Excel database for crop protection dosage calculations, replacing manual paper records.
- Cost Reduction: Applied data-driven cost/quality analysis delivering 23% cost savings per producer and 15% customer base growth.
- Process Efficiency: Organized operational records and documentation, improving office efficiency by 20%.
- Invoicing & Inventory: Issued invoices and delivery notes, processed payments and account settlements, and handled inventory when needed.
- Client Advisory: Provided tailored technical guidance improving product application accuracy.

Skills: Excel, Data Analysis, Cost Optimization, Client Advisory

Quality Control Data Analyst | 06/2024 to 09/2024

D. Nomikos Food Industry | Farsala, Greece

- Data Analysis (Python): Built a custom Python tool (Pandas, NumPy, Matplotlib) for production data analysis and financial loss prediction, published on GitHub.
- Quality & Compliance: Implemented HACCP and ISO 22000 protocols, reducing raw material deviations by 25%.
- Cost Impact: Conducted physicochemical analyses preventing batch rejections and reducing operational costs by 15%.

Skills: Python, Pandas, NumPy, HACCP, ISO 22000

Accounting & Financial Data Assistant | 05/2019 to 10/2019

Balkura Konstantia Accounting Office | Domokos, Greece

- Bookkeeping: Maintained single-entry records and organized financial archives using Epsilon Net EXTRA.
- VAT Processing: Processed invoices reducing late VAT submission penalties by 98%.
- Client Portfolio: Managed client communication contributing to 20% growth in active clients.

Skills: Epsilon Net, Bookkeeping, VAT Processing, Financial Records
